

Drinking Water Solutions for all Businesses

In Partnership with

Working with Refill

Waterlogic are the world's leading provider of workplace drinking water solutions and have over 25 years' experience within the industry. We help hydrate over 50 million people across the world each day. At Waterlogic, we believe we have a responsibility to help look after the Earth, and its most valuable resource, Water.

We believe that single-use plastic is a thing of the past and are working to reduce its use for our ourselves, our customers and the future. At Waterlogic making the planet greener, whilst providing better quality drinking water to all is important to us, that's why we've partnered with Refill.

Refill Station

How it Works

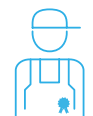

Free Site Survey

Our team will arrange a free consultation and site survey to understand your business refill needs and requirements. With over 25 years' experience within the industry, there isn't much we haven't already seen.

Tailored Solution

After reviewing your business needs, our expert team will put together a bespoke recommendation based around expected footfall, capacity, location and budget. With our wide product range and access to industry leading technology we will find the right solution for you.

Easy Installation

We will arrange for one of our British Water Cooler Association (BWCA) qualified service technicians to install your water dispensers at a time and date to suit you.

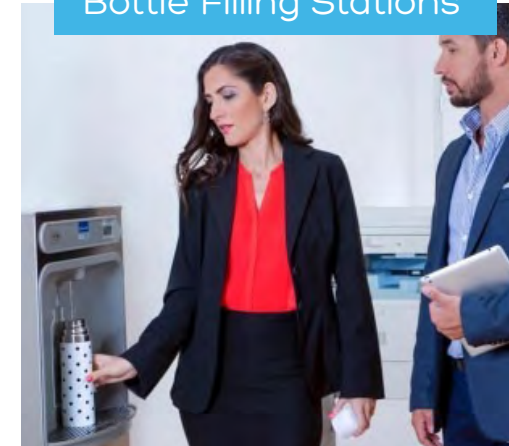

Regular Servicing & Maintenance

We schedule regular services including machine sanitisations and filter changes. Our team will also advise you on a recommended cleaning schedule to ensure on-going high level performance between visits.

Our Refill Product Range

Bottle Filling Stations

Bottle Filling stations offer visitors instant access to drinking water, you may have seen them in Railway stations around the country.

They feature a hygienic touchless dispense and Silver ion anti-microbial protection, reducing cross contamination between users. They provide a high volume of water, producing up to 180 litres per hour, so you won't have to worry about queues. They also feature handy bottle counter display, which totals up the amount of single-use plastic bottles you have helped eliminate.

Undercounter Systems

Our range of undercounter systems comes with a stylish counter-top tap to dispense water. They utilise industry leading filtration technology to provide access to high quality great tasting water. We offer a variety of options including compact space saving systems.

You can even add refill branding to our counter-top taps. This will help increase the presence of the brand within your venue and help raise awareness of the scheme.

Mains-fed Dispensers

Our Waterlogic mains-fed dispensers are designed, manufactured, installed and serviced in-house. This allows us to offer unparalleled product quality and efficient service. They are all made using reusable materials, meaning the end of one products life is simply the beginning of another.

Waterlogic mains-fed machines provide you access to industry leading purification technology, ensuring great tasting, purified and filtered water for your customers. They can also be used to provide a range of water options - cold, ambient, hot, extra hot and sparkling.
